SupaMatt[™]
Guide.

Design, manufacture, craft and care

**MelaWood®
SupaMatt™**

DIN EN 13722
Gloss level < 2.9 GE (65°)

Applications

interior vertical door and drawer frontals furniture

Hot coated polyurethane (PUR) and Excimer lamp

PG Bison brings the latest in world trends to your doorstep with MelaWood® SupaMatt™.

MelaWood® SupaMatt™ has a soft, silky-smooth and sophisticated finish, adding a sense of elegance to any setting. This luxurious ultra-matt experience is for use in vertical applications only. MelaWood® SupaMatt™ incorporates leading technology to reduce the visibility of day-to-day fingerprints but cannot prevent them entirely, as there will always be a transfer of surface oils from your fingertips to the surface of the panel. With the correct care and treatment, this can be kept to a minimum.

Sophisticated technology is used to produce MelaWood® SupaMatt™. A hot coated polyurethane (PUR) is applied to MelaWood® with a SupaWood® core, before the uppermost coating is matted using the latest technology, specialised

Excimer lamps and cured with ultraviolet (UV) light.

Locally manufactured by PG Bison, to international standards, you are assured of a dependable, readily available product, with the quality and consistency you have come to expect from PG Bison.

MelaWood® SupaMatt™ is supplied with a protective film to shield the matt face during handling and processing, so your finished product can arrive on site looking as good as you intended. The reverse side is a matching décor in NATURAL TOUCH finish.

For that luxurious touch and exclusive look, MelaWood® SupaMatt™ is your premium matt surface.

MelaWood® SupaMatt™
